## Bio

“Raisin’ Cain” plays an eclectic mix of folk music, with influences from singer/songwriter, country, swing, blues, pop and roots music of all types. A typical set includes a mixture of these influences, along with a strong selection of original songs.

This exciting musical group likes to keep you guessing when it comes to their musical offerings. You just never know what musical genre they will draw from next, or what fascinating “twist” they’ll use in their arrangements of songs that you know. That’s how they “*raise a little cain*” with their music!
